

Thermonet FOIL

100 + 150w/m²

Thermonet's underfloor heating foil is designed to make installation of heating under engineered timber floors even easier.

Thermonet heating foil is not designed for use in wet areas.

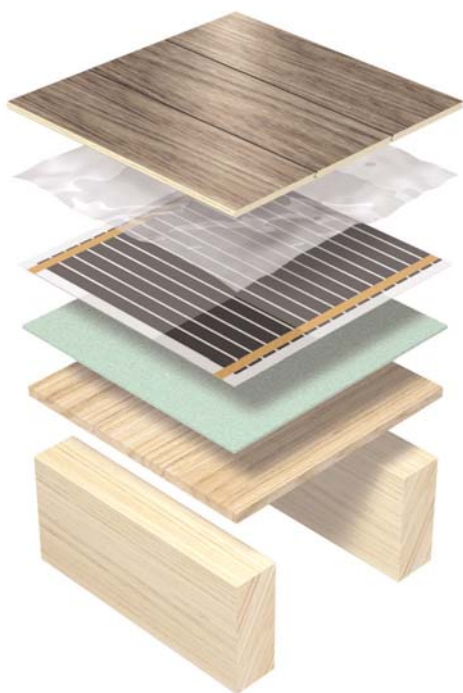

Thermonet foil comprises of 3 layers of polyester which encapsulates the copper bus bar and conductive heating strips creating an ultra thin heating system in outputs to suit the heating requirements of virtually any building.

Thermonet Foil comes pre-terminated for ease of installation, however if you do need to trim a length on site we offer the adaption kit to ensure correct re-termination.

- COMES ON THE ROLL
- PRE-TERMINATED
- 3LM CONNECTION WIRE
- TESTED TO 2500V
- 10 YEAR NO QUIBBLE WARRANTY
- MINIMAL HEIGHT BUILD UP

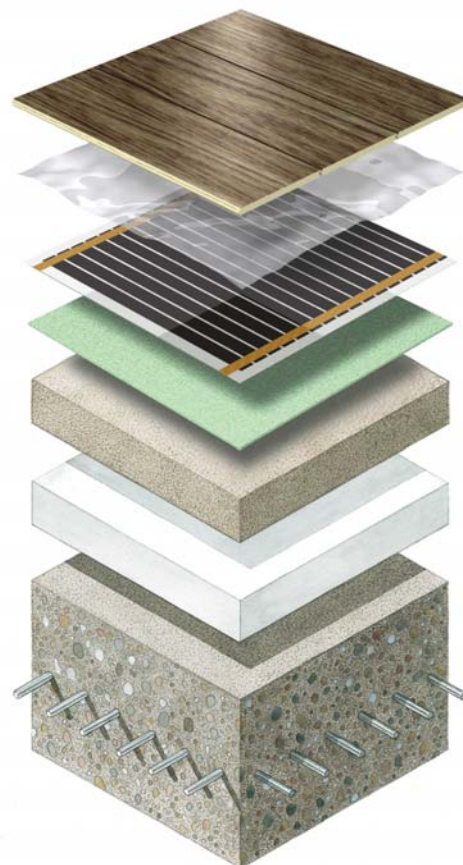

FOR THERMOSTATS [SEE PAGE 14](#)
